

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of the Disclosure.

Please add the following new Abstract of the Disclosure:

An internet connection service providing method and internet connection service system for carrying out the method are provided. The method comprises presetting a service class for a user, among a plurality of service classes, where the service class is selected by the user, authenticating the user according to the preset service class when the user logs-in to a network, recognizing the preset service class for the user, and providing a service corresponding to the recognized service class.
